

We Need Your Help!

Participation in the Sterilizer Monitoring Service helps support several of our Dental Student projects.

- ★ "Welcome to the Profession"
- ★ The Senior Awards Breakfast and Class Picture
- ★ Graduation Family Reception
- ★ Distribution of "A Man of Works: The Life of James Porter Hollers"
- ★ And other projects sponsored by the Dental School Alumni Association upon request.

Our spore strip kits can be used in steam, chemiclave, dry heat and ethylene oxide gas sterilizers. Each kit contains two (1) test strip to confirm sterile conditions throughout the chamber, and one (1) control strip to guarantee accurate results, and a return mailer for confirmation of test results. The culturing service is included in the price of the kit.

Culture reports are mailed on a quarterly basis. In the event that you have a positive culture result you will be notified immediately by phone and a laboratory report will be sent to you.

ADA and CDC recommend weekly verification and documentation of instrument sterilization

We look forward to your participation in this program.
